

My Family's Living Room

Applicable Age Group 3-4 year-old toddlers

- Activity Objectives**
- ☑ Understand the division of functional areas in a room and the functions of various facilities.
 - ☑ Plan and layout the living room scene and share leisure time.

Activity Description You will play a hide-and-seek game with children centered on the room to help them learn about different functional areas inside. The focus of this activity is the bedroom—children will learn the function of the bedroom, explore the structure of the bed (the most important item in the bedroom), and build a bed of appropriate size through comparison.

STEAM Competence Development Indicators

Method Indicator	Game-based introduction: Understand the function of a living room	Plan the layout and design a model	Test and refine	Further explore the functions of a living room
Curiosity and Imagination	●			
Flexibility and Adaptability				
Verbal and Written Communication Skills				●
Cross-boundary Cooperation and Exemplary Leadership				
Critical Thinking and Problem-solving Skills			●	
Proactive and Pioneering Spirit				
Ability to Evaluate and Analyze Information		●		

Interactive Tips

- When talking about what is in a living room, children can share based on their life experience. The living room is not only fixed with a coffee table and a TV—it can also have a bookshelf, a tea table, a piano, etc.
- Let children take the initiative in the building part. They can restore their own living room or the living room they imagine; the key is to create an atmosphere of leisure time together in the living room.
