

Giraffe

Applicable Age Group 3-4 year-old toddlers

- Activity Objectives**
- ☑ Understand the concept of height by comparing the tallness and shortness of giraffes.
 - ☑ Learn about the physical characteristics and living habits of giraffes.

Activity Description Explore the physical characteristics of giraffes with children—long necks, tall bodies, brown spots on their fur, and a preference for eating leaves. Use building blocks to build giraffes based on these characteristics. Compare the tallness and shortness of different giraffe models to help children recognize "tall" and "short" and understand the concept of height.

STEAM Competence Development Indicators

Method Indicator	Game-based introduction: understand giraffe appearances	Build a giraffe with a long neck	Use giraffes to compare heights	Build scenarios to learn about giraffes' living habits
Curiosity and Imagination	●			
Flexibility and Adaptability		●		
Verbal and Written Communication Skills				
Cross-boundary Cooperation and Exemplary Leadership				
Critical Thinking and Problem-solving Skills			●	
Proactive and Pioneering Spirit				●
Ability to Evaluate and Analyze Information				

Interactive Tips

- Stability is the most basic requirement. Observe and guide children to explore stable structure construction during the hands-on process.
- Guide children to build from bottom to top: first the legs, then the body, followed by the neck, and finally the head.

 Find These Building Blocks

 Build by Imitating the Physical Features of a Giraffe
