Retro Telephone

Applicable Age Group   4-5 year-old toddlers

Activity Objectives
☑ Understand the development process of telephones through storytelling.
☑ Explore the structure and working process of retro telephones.

Activity Description
By telling children the development process of communication tools, they can learn about the powerful functions of modern mobile phones and feel the great changes that technological progress has brought to human life. This activity also involves exploring the complete structure and complex working process of retro telephones.

⚙ STEAM Literacy Development Indicators

Method / Indicator	Story-based introduction: Understand communication tools	Hands-on practice: Imitate and build a model	Test and refine	Knowledge expansion: Explore the working process of telephones
Curiosity and Imagination	🔴			
Flexibility and Adaptability		🔴		
Verbal and Written Communication Skills				
Cross-boundary Cooperation and Exemplary Leadership				
Critical Thinking and Problem-solving Skills				
Proactive and Pioneering Spirit				🔴
Ability to Evaluate and Analyze Information			🔴	

💡 Interactive Tips

- Children are relatively unfamiliar with retro telephones, so they mostly imitate the appearance in pictures when building. Provide more opportunities for children to observe while constructing.
- Imitation is a very important method for children in the learning process. Let them imitate first, accumulate certain experience, and then carry out creative building on this basis.
